

Hello,

As an invited student participant of GLEON 10 we ask that you prepare a poster for the student poster session that will occur during the meeting. The poster session is designed to be an informal way for you to interact with your peers and present your research to the scientists and information technology specialists that will be attending GLEON 10. We invite you to present a poster that highlights your past and/or current research and, if possible, to focus on projects that relate to GLEON-oriented sensor network aquatic science and information technology.

Please email Emily Kara (Kara@wisc.edu) the title, author(s), affiliation(s), and abstract of your poster by **April 10, 2010**. Please use the following sample format:

Kevin C. ROSE¹, Marilyn Larsen², and Paul C. Hanson²

Integration of traditional measurements of allochthony with high frequency buoy data from GLEON sites: does temporal scale matter?

¹Department of Zoology, Miami University, Oxford, Ohio, USA

²Center for Limnology, University of Wisconsin-Madison, Madison, Wisconsin, USA

Write your abstract here; please keep the length to a maximum of 250 words. Please describe your research in a manner that is understandable by limnologists, aquatic scientists, and information technology experts. We will distribute your abstract to meeting participants and display the abstracts online at our website at www.gleon.org.

A few guidelines:

- All poster content must be in English
- Poster width and height should not exceed 110 cm (42 inches).
- All posters must be printed out before you arrive at the GLEON meeting
- Tacks will be provided to hang your poster

Please feel free to email us if you have any additional questions.

Sincerely,

Emily Kara Kara@wisc.edu

Kevin Rose RoseKC@muohio.edu
