

Jordan Read

Jordan Read has been the Co-Chair of the Student Association since early 2010, and a member of GLEON since 2007. Jordan is a PhD candidate at the University of Wisconsin-Madison's Civil and Environmental Engineering Program, studying environmental fluid mechanics under Professor Chin Wu. Jordan's research aims include hydrodynamic modeling of lake systems, stratification dynamics and mixing regimes of small lakes, and whole lake manipulations focusing on the effects of thermal destratification. Jordan is currently using GLEON data in an effort of develop an accurate numerical model for small humic lakes.
