

Kevin Rose

Kevin Rose has been Chair of the GLEON Student Association since early 2009 and a member of GLEON since spring 2006. Prior to this, Kevin was the GLEON Student Association co-chair in 2008. Kevin is a Ph.D. student in the Department of Zoology at Miami University in Oxford, OH. His research involves understanding carbon cycling in lakes with an emphasis on the role of photobleaching and allochthony in carbon cycling and in regulating transparency. Collaborating with several other scientists in GLEON, Kevin is currently using GLEON data to understand the drivers of variation in lake metabolism around the world
